

Electric pedestrian pallet truck (kg)

Affordable pallet trucks, delivering reliable and cost-effective handling.

The solution for applications across many industries.

The CBD 12W-Li is the entry-level model of the electric pedestrian pallet truck range with lithium-ion battery. Intended for easy applications in the internal material flow and thanks to its compact design and extremely light weight, it is especially suited for operations in narrow spaces and weight-sensitive environments such as when loading and unloading lorries. High battery capacities as well as boost and opportunity charging ensure high truck availability and long operating hours.

All Ameise products are designed to be easy to operate and maintain. The use of qualitative, robust components help contribute to reliable operation and lower wear and tear.

Your benefits at a glance

- Rugged and high-performing light weight body provides exceptional maneuverability in confined areas.
- 24/7 continuous operation with 2 batteries, one charging, one working.
- Suitable for indoor as well as outdoor use.
- Brushless motor makes the driving system more efficient and easy to maintain.
- Cost-effective product matching most of the basic transportation requirements.

Your Ameise truck for maximum customer benefit.

Affordable

Good performance at a lower price.

- The lithium-ion battery is maintenance-free, which eliminates personnel costs for maintenance, as well as the cost of an expensive charging infrastructure (e.g. charging rooms, ventilation).
- With brushless motor, no brush should be exchanged periodically, which saves the cost for the owners and increases uptime.
- Low cost of ownership due to affordable purchase price and reduced operating cost.

Reliable

Quality robust components that you can trust.

- The lithium-ion battery is light and easily removed from the truck for convenience when charging needed.
- Excellent protection against dust and humidity through IP 54 enclosure of controller and plugs.
- Tandem load wheels together with entry guide wheel for better stability and easier pallet-in.
- The battery enables flexible usage even in multi-shift operation due to its rapid charge and boost charging features.

Comfortable

Designed for operator comfort.

- High degree of availability thanks to extremely short charging times.
- Reduced support wheel wear when approaching ramps at an angle thanks to level equalization.
- Easy access to all components due to the open design of driving and brake system. • Tiller arm optimally adapted to the ergonomic needs of the operator.
- Clear color coding and buttons with wearresistant icons ensure intuitive operation.
